

# STRATEGIES FOR ON DEMAND MIS

Business Intelligence Software

## Strategies For On Demand MIS

We recommend the use of 1KEY MIS Reporting Tool in below five mentioned strategies to get on demand MIS.

### Recommended Strategies

- 1) Take in account the reporting and analysis needs of all business users (Executives) with the CXO and managers. Data garnered should be appropriate for all the business users with correct and precise insights whenever needed.

#### What 1KEY Offers

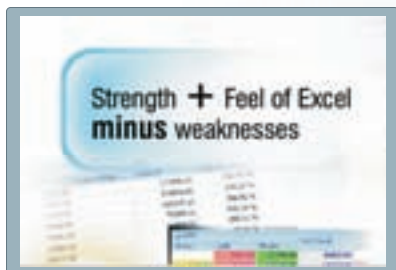

1KEY delivers a comprehensive and flexible MIS platform that integrates and supports all leading databases and applications. 1KEY will ensure a 360 - degree MIS view by recognizing different needs segment wise giving precise insights.

- 2) Educate business users to rely on single source of truthful data. Forbid use of spreadsheets in meetings and presentations. Wide spread use of spreadsheets across the enterprise can create multiple versions of truthful data.

#### What 1KEY Offers

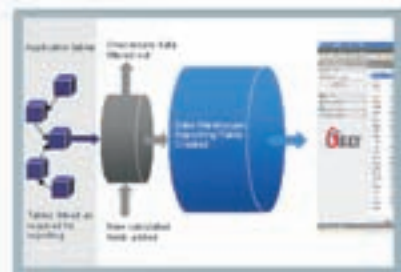

1KEY analytic functionalities with visually stunning reports will help business user's move away from spreadsheets and help MIS Managers generate report by connecting information among disparate applications.

- 3) Establish data quality competency centre. Establish the system with the data which has an audit trail with referential integrity and data integrity in place. Garbage In Garbage Out

#### What 1KEY Offers

1KEY MIS reporting solution offers solutions to effectively manage data centric applications. MIS managers can handle data complexities and optimize it for on demand preventive and predictive analysis data which has complete referential integrity

## Recommended Strategies

- 4) Unlock your enterprise from the transaction based application for reporting needs. Your existing SCM, ERP, CRM etc. are best for recording your transactions but not for generation of intelligent insight reports. Specialized reporting and analysis applications can expose your business users to all together new meaningful way of viewing data and analyzing data.

### What 1KEY Offers

Automatic and manual data cleansing is possible with an intuitive rule builder. Data analysis and data warehouse architecture design is aided by the data profiling functionality in the 1KEY application. The data from the data warehouse can then be drawn into as analytical reports for multi-dimensional analysis. 1KEY MIS addresses the needs of enterprise analytics for vertical markets such as Service (Financial, Government, Education and Health Care), Asset intensive (Aviation, Fleet Management and Utilities) and Manufacturing (Process and Discrete).

1KEY has a rich repository of metrics, reports and alerts as predefined content across various industry verticals.

- 5) Get the analysis of your data done inhouse. Do not outsource the reporting and analysis to a third party. It should be a part of daily use and not just a quarterly or yearly report submitted by a third party. Develop and implement the reporting and analysis system in house and roll out for all the business users of your enterprise.

### What 1KEY Offers

1KEY MIS Reporting tool guarantees truth as MIS is generated within the organization and cannot be manipulated by third party. 1KEY eliminates the need to save multiple copies of a spreadsheet to reflect snapshot data at different points in time, and overcomes the challenges associated with changes to historical data that then cause the snapshot-type spreadsheets to be incorrect.

1KEY continues to offer MIS Managers a big opportunity to help their organizations and clients better analyse their operations. It's time to get on the 1KEY MIS Reporting bandwagon preferably in the driver's seat. It's not just about number crunching. You can help reduce the risk of reporting errors. You can ensure the systems are effective and efficient, and not too dependent on one person or human. Most important, you can make sure 1KEY MIS Reporting is answering the right questions. Get in touch with us now.

## BI Reporting Standard

### To succeed as an enterprise BI reporting standard, a solution must:

- Accommodate thousands of users with ease of affordability without prohibitive software license costs
- Provide flexible reporting that improves decision-making by a wide range of users
- Access any enterprise data source

MAIA Intelligence has all of the above 3 major points which establishes an enterprise class BI reporting solutions company. MAIA Intelligence has a proven track record of delivering efficient BI reporting solutions results for leading enterprises. Our focus is to provide affordable business intelligence reporting for large enterprise.

### Everybody claims affordability we can prove it

While affordability doesn't sound glamorous, it has major implications for a business intelligence reporting roll out. If a BI reporting system is expensive, out of budget can't reach thousands of users inside the enterprise and beyond, it's impossible to deliver the kinds of intelligence solutions that enable organizations to better motivate employees, renovate their business processes to reduce cost, and innovate to provide competitive advantage and improved responsiveness to customers and partners. MAIA Intelligence enables organizations to reduce over all TCO associated with deploying Business Intelligence reporting applications, while ensuring that these applications can continue to grow as business requirements change.

### Reliable Yet Economical

### Multi Formatted, Visually Stunning & Flexible Reporting

The 1KEY Flexible Reporting software provides executives, business users, and analysts with the most intuitive user-directed query and analysis capabilities available today. It delivers powerful query, analysis, and reporting capabilities through an intuitive and highly interactive interface that lets users drill down, sort, filter, group, alert, schedule reports & then quickly monitor and navigate relevant information. It's easy to deploy, provides access to data locked in transactional systems, and leverages information from your existing data stores. It can generate rich formatted reports which can be further exported to Excel, HTML, XML, PDF etc.

## Extract, Transform & Load data from any source

1KEY BI reporting solutions manages all the data in the organization no matter where it resides—whether on web servers, legacy and operational systems, diverse data stores or applications. In even the most complicated IT environments, We have implemented our Business Intelligence reporting solutions in customer environments with most major enterprise applications running on leading relational databases and platforms, including DB2, Oracle, Sybase, SQL Server, and others. Our BI reporting solutions enables customers to easily and cost-effectively, capture, transform and flow data throughout the enterprise.

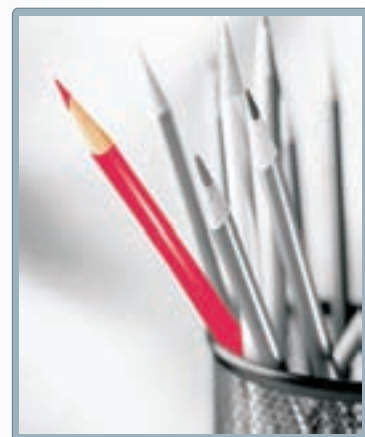

## Value Proposition

Our Products help your organization, if:

- Key users/user groups have not adopted your BI tools
- You are in spreadsheet purgatory
- Business users are spending more time on analysis than action
- Critical issues are not made readily apparent without having to sift through reams of reports and data
- Business users need to rely on IT or analysts to get information
- Business users don't know what questions to ask about the data
- It is difficult to investigate issues to understand why
- Business users are drawing incorrect conclusions and missing opportunities
- You wish to deploy applications and share information with external parties such as customers, suppliers and partners
- By providing a very compelling user experience that requires little/no training and no reliance on IT to write reports/queries for them, business users can speed up decision-making by spending less time involved in analysis and more time taking action. **Data 2 Decision**

## Cost- Effective BI with Sharpened Analysis

## Consistently Outperform with Better Decision

**1KEY Solution for all applications**

**Generate customised reports using 1KEY**
