

MAIA Intelligence's Company Profile

Our Company

Commenced in 2006, MAIA Intelligence is young and innovative company in powerful business intelligence reporting and analysis software product space. With a mission to democratize BI, MAIA is growing exponentially and has established itself as an emerging leader in Operational BI market. Built on .net platform MAIA's 1KEY BI products and solutions have revolutionized the way BI can be deployed. Company's vision is to change the paradigm in BI space and make it available to masses instead of restricting the technology to experts few.

We have been selected as one of the NASSCOM 100 Top IT INNOVATORS in 2007. As a pioneer among companies that looked at XBRL (eXtensible Business Reporting Language) based on XML, the company wishes to tie up with software solutions companies to jointly explore business opportunities in the US. It has also been named in Red Herring 2008 Finalists 100 for Asia

In today's scenario, MIS analysis of any data is most important aspect of business. Hence, if one could derive the necessary information for making business decisions, the data will be worth its value else, it remains in the system without any direct impact to business.

In various organizations, all the MISs are in place, but the amount of time spent on analyzing data and generating reports is very high and so are the administrative overheads and cost.

Our Products

MAIA Intelligence develops and offers product and solutions in BI space based on innovative technology powered by a robust Microsoft stack with highly experienced technocrat team.

Our software product 1KEY BI help companies take informed and better decisions at all levels. 1KEY BI has been used in various companies with more than 3500+ users across the globe.

1KEY BI has be developed on Microsoft platform using dot net technologies. It has been third party tested with for 1000users and 70GB of data reporting on various platforms of windows and databases. It can accommodate thousands of users, connect disparate data sources and deliver visually stunning, multi-formatted and flexible reports.

1KEY BI products can help to unlock the full potential return on a BI investment by providing visual reporting and guided analysis for business users. 1KEY BI software product is geared toward business users with needs not met within their existing BI tools. 1KEY BI provides a very intuitive, interactive and highly visual interface that lets users see problems, both summary and details, in a very understandable way. We have proved

case studies in Manufacturing, Financial Services, Healthcare, Construction and many other industries.

1KEY BI connects and communicates to all type of applications, irrespective of the database used at the backend. 1KEY provides interfaces for all users, viz.: technical professionals for query building as well as business users for click through reports which helps the users to create dynamic reports quickly and efficiently.

1KEY consists of wide range of components, with a variety of features to suit different business requirements.

1KEY caters to the growing needs of the modern age business houses. 1KEY helps the organizations to analyze any type of data from single and multiple sources and derive more meaningful and accurate information that will facilitate faster and, consequently profitable business decisions. 1KEY supports slicing and dicing of data to the root level providing the ease of micro as well as macro level analysis, making the data speak to you virtually.

1KEY Agile BI Suite – For Mid-Market & Large Enterprises

1KEY Agile – Business Intelligence Suite is a comprehensive end to end BI capabilities and a path breaking innovation catering to strategic, tactical & operational data analysis and reporting needs of multiple verticals. This BI suite has an integrated offering with a choice to pick and choose modules enables organizations to deploy BI framework with minimal investments. 1KEY is Client Server as well as web based reporting tool which connects to multiple databases, multiple applications to generate the MIS reports. The product is developed using Microsoft .Net Technology. It can generate rich formatted reports which can be further exported to Excel, HTML, XML etc.

1KEY Agile BI Suite is the only single layer, interoperable, ground up built, comprehensive, integrated, end-to-end BI Suite with flexibility for users to pick and choose modules and various presentation layers catering to the MIS reporting and data analysis needs of Operational, Tactical and Strategic level business users across the enterprise.

1KEY Agile BI Suite is a powerful and robust application which connects multiple applications. Our customers' CXO level groups have experienced these benefits with the highest adoption ratio. It is now used by both, expert BI analysts and Operational Business Users en-masse.

1KEY FCM – Financial Consolidation Management for enterprise group having multi-location, multi-company accounting systems

1KEY FCM, a financial consolidation management tool caters to and solves all the challenges and eliminates the potential errors and reduces time spent on repetitive manual processes with its multicurrency capabilities, automated calculations and adjustments, and other features that address accounting and regulatory issues.

1KEY FCM brings together financial data from disparate sources spread across multiple locations to create a single, global view of financial information across the entire enterprise. It eliminates consolidation challenges, improves financial controls for statutory compliance and enables faster financial books closing times. By providing one consistent view of your enterprise's financial position across organizational boundaries, enterprises can strengthen confidence in financial results and control, adapt to changing business conditions.

1KEY MIS Server - For Small & Medium Size companies

MAIA Intelligence came up with an SMB offering in October 2008. 1KEY MIS Server is the compact version of 1KEY Agile BI Suite with limited selected modules catering to the requirements of business users in SMB segment. 1KEY MIS Server is affordable, easy-to-use business management information software. It provides a single integrated system to extract data and create critical business MIS across all business functions. With 1KEY MIS Server, instantaneously access a complete and up-to-the-minute view of business, so as to respond to customers faster and grow business more profitably.

1KEYonline.com: BI in SaaS (Software-As-A-Service) model (Upcoming)

MAIA Intelligence is developing a BI solution in SaaS delivery model. BI Customers pay only for what they use, with no up-front expenses or long-term commitments. BI on SaaS

model connects to software and data on the Internet (the cloud) instead of on your hard drive or local network.

1KEY in SaaS (Software-As-A-Service) model shall enable companies to reduce their data center investments and allow employees to reduce their time commuting. While reducing our carbon footprint is good for society, leveraging shared services is also good for corporate wallets. 1KEY in a SaaS model would be a potent carbon-reduction tool when offered through large-scale operations.

SaaS represents technology that serves business needs first, yet is also greener than existing technologies. SaaS reduces the amount of power consumed, and volume of physical hardware and software produced and shipped. From a business point of view, user mobility is increased and data is centrally stored, better controlled and more secure.

Computer Aided Audit & Investigation Tool

1KEY Investigator is designed and developed to make the lives of auditors, accountants and other finance professionals easier. 1KEY Investigator is developed on Microsoft .Net technology with various functions and features all focused towards accounting / auditing.

Presenting 1KEY Investigator - Data 4 Analysis - a comprehensive Audit Tool backed by amazing speed simplicity. 1KEY Investigator is created to simplify your audit processes while offering complete reliability and total quality. 1KEY Investigator from MAIA Intelligence is designed to help you achieve enhanced auditing excellence easily, quickly and cost effectively; thus helping you save time and offer greater value.

1KEY Data Search - On The Spot Business Intelligence

1KEY Data Search is the next generation search engine which has very high potential in the near future. Now a days BI tools are doing extremely great job when it comes to the business data analysis. But the complexity in these tools is to provide these complex analytics certainly restrict the end users when it comes to searching the relevant data. Now for solving these issues Data Search Engines are gaining the importance.

XBRL - eXtensible Business Reporting Language

XBRL is a language for the electronic communication of business and financial data which is set to revolutionize business reporting around the world.

It provides major benefits in the preparation, analysis and communication of business information. It offers cost savings, greater efficiency and improved accuracy and reliability to all those involved in supplying or using financial data.

It is already being put to practical use in a number of countries and implementations of XBRL are growing rapidly around the world. It is one of a family of "XML" languages which is becoming a standard means of communicating information between businesses and on the internet.

Leverage SAP investments with 1KEY BI

1KEY SAP Connector lets you access, extract, and integrate data from your SAP system into 1KEY Agile. The 1KEY SAP Connector extends the system's functionality to SAP data sources.

1KEY SAP Connector interacts with SAP Data-structure for reporting purpose. The Connector interacts through RFC, BAPI's and provides the business user with secured analytical and reporting environment. 1KEY Agile BI Suite along with SAP connector provides the Organization to publish the information across the Organization and the WEB based on the information needs of the user.

Enhance Tally data with Analytics from 1KEY

Unlock the value of financial accounting and inventory data captured within the flat files of Tally with Tally Analytics from 1KEY by creating dynamic MIS, ad-hoc reporting & powerful analysis.

1KEY talks to and connects to Tally & lets users to create dynamic report quickly and easily. Today MIS analysis of accounts & inventory data is most important aspect of business. If one could derive desired decision making information out of this data, then only the data is worth its value.

1KEY caters to these needs of the modern age & competitive business. Users of Tally have got all the information in Tally, still they are spending maximum time in preparing reports. 1KEY can help you to analyze Tally data and derive meaningful information, resulting into faster, accurate & profitable decision. 1KEY enables to slice & dice the Tally data and to make it more significant, serving micro & macro level analysis. It virtually makes your Tally speak to you.

Empower Business Users & Decision Makers with Interactive Dashboard

A point and click Visual Analysis Software to create flash-based interactive dashboard from live corporate data. 1KEY Touch Dashboard, part of the MAIA Intelligence's 1KEY Agile BI Suite portfolio of solutions, transforms any type of data into insightful dashboards. The dashboards enable decision makers to monitor business performance, identify critical data relationships, and use what-if scenarios to understand potential performance. You can consolidate multiple reports and data from various locations into a single dashboard – giving you a holistic view of your company's data.
